

TABLES

Table 1. Ranking of Major Threats to Coral Reef Ecosystems By Region.

This table is a general summary of the relative impact (H = high, M = medium, L = low) of natural and human-related threats to United States and international coral reefs by region. Rankings were provided by scientists, managers, and representatives of the United States Coral Reef Task Force for use in this document. The actual impacts of each threat will vary within and between regions depending on conditions, location, and other factors.
